

Rugged. Reliable. Versatile.

Installation takes around 3 weeks and is priced at US \$ 27.500,00. Please notice that the Jump Package is based on a FAA STC approval.

Quest KODIAK – Skydive Jump Specifications

The Parachute Operations Installation is designed to accommodate parachute jumping operations by manual or automatic deployment. The installation includes the following items:

- Transparent vertical sliding door made of polycarbonate
- Wind deflector – installed inside the fuselage at the aft edge of the cargo door
- Internal and external grab bar
- Step – located aft of the cargo door outside of the fuselage
- Jump signal lights and switches
- Video camera – mounted on the lower aft portion of the left wing
- Video monitor and recorder – located on the left interior sidewall aft of the cargo door
- Static line attachment – located on the right interior sidewall across from the cargo door
- Rear view mirror – located just below the magnetic compass
